TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++

Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI, Redux Toolkit, React Query, React Router, Material UI

Backend: Node.js, Express.js, REST APIs, WebSockets (Socket.io), JWT Authentication, Stripe

Databases: MongoDB, PostgreSQL, Redis, Firestore

DevOps: Docker, Nginx, GitHub Actions, AWS

Tools: Git, GitHub, Postman, Vercel

PROJECTS

SkillStack – Learning Management System | *Next.js, TypeScript, Express.js, MongoDB, Redis* | **GitHub** | **Live**

- Reduced content piracy risk by implementing DRM-protected video streaming using VdoCipher in a full-stack LMS platform.
- Integrated Stripe with automated role-based onboarding workflows for seamless payment processing and course enrollment.
- Improved analytics dashboard responsiveness using Redis caching and optimized MongoDB queries.
- Built a Socket.io-based notification system enabling real-time student-instructor communication.
- Developed analytics dashboards with Recharts to visualize enrollment trends and revenue metrics.

SwiftCart – Multi-Vendor E-commerce Platform | *React.js, Node.js, Express.js, MongoDB, Socket.io* | **GitHub** | **Live**

- Built a Socket.io-based messaging system for real-time customer-vendor communication in a multi-vendor marketplace.
- Implemented real-time flash-sale countdowns and event-driven UI updates to increase user engagement during promotions.
- Improved transaction security and role isolation by implementing JWT-based authentication for buyers, sellers, and admins.
- Automated vendor revenue distribution by integrating Stripe payment processing with secure multi-vendor payout logic.
- Optimized product search by implementing indexed MongoDB queries and paginated filtering.

ACHIEVEMENTS

- Contributed **15+ merged pull requests** across **Chromium, Joplin, GoalSlot**, and other open-source projects through GitHub and Gerrit review workflows.
- Awarded the **Bronze Fellowship Certificate**, ranking among the **top 70 out of 800+ participants** across 5 countries in the DevWeekends Software Engineering Fellowship.
- Published **technical articles** simplifying networking, system design, and web fundamentals for developers.

EXPERIENCE

Software Engineering Fellow

Remote

DevWeekends Fellowship

Jun 2025 – Sep 2025

- Completed a competitive 3-month software engineering fellowship focused on full-stack development and advanced problem solving.
- Built **SkillStack** and **SwiftCart** under mentor guidance, applying scalable architecture, secure authentication, and real-time features.
- Worked closely with mentors through regular code reviews and technical feedback, strengthening software design, debugging, and collaborative development practices.

Freelance Web Developer

Remote

Fiverr

Jul 2023 – Sep 2024

- Engineered custom full-stack applications for international clients, including dynamic agency portfolios and administrative query management dashboards using Next.js and Tailwind CSS.
- Diagnosed and resolved a critical Docker environment failure for a client, repairing broken containers and database schemas to restore the application to live production.
- Maintained a 5-star client rating across completed projects by delivering scalable React components and optimized backend APIs within strict deadlines.

EDUCATION

University of Lahore

Bachelor of Science in Computer Science

Lahore, Pakistan

Sep 2023 – Jun 2027
