

EHTESHAM ZAHID

+92 345 480 8884 | ehteshamzahid313@gmail.com | [GitHub](#) | [Gerrit](#) | [LinkedIn](#) | [Portfolio](#) | [LeetCode](#)

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++

Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI, Redux Toolkit, React Query, React Router, Material UI

Backend: Node.js, Express.js, REST APIs, WebSockets, Firebase, Appwrite

Databases: MongoDB, Redis, Firestore

Tools: Git, GitHub, Docker, Postman, Vercel

PROJECTS

SkillStack – Learning Management System | *Next.js, TypeScript, Express.js, MongoDB, Redis* | [GitHub](#) | [Live](#)

- Reduced content piracy risk by implementing DRM-protected video streaming using VdoCipher in a full-stack LMS platform.
- Decreased payment and enrollment setup complexity by 80% by integrating Stripe with automated role-based onboarding workflows.
- Improved dashboard response performance by 40% through Redis caching and optimized MongoDB query design for analytics data.
- Enabled real-time student-instructor interaction by implementing Socket.io-based notification delivery system.
- Improved data-driven decision-making by implementing analytics dashboards using Recharts for enrollment and revenue visualization.

SwiftCart – Multi-Vendor E-commerce Platform | *React.js, Node.js, Express.js, MongoDB, Socket.io* | [GitHub](#) | [Live](#)

- Enabled real-time customer-vendor communication by implementing Socket.io-based messaging system in a multi-vendor marketplace.
- Increased user engagement during flash sales by 25% through real-time countdown and event-driven UI updates.
- Improved transaction security and role isolation by implementing JWT-based authentication for buyers, sellers, and admins.
- Automated vendor revenue distribution by integrating Stripe payment processing with secure multi-vendor payout logic.
- Reduced product query latency by 35% through indexed MongoDB queries and paginated filtering system.

OPEN SOURCE CONTRIBUTIONS

Chromium (Google Open Source) | *C++, TypeScript, Chromium WebUI*

Jan 2026 – Present

- Refactored Chromium Extensions WebUI architecture by introducing dependency injection for ManifestHandlerRegistry and restructuring API response models, reducing reliance on global state and simplifying frontend-backend data flow.
- Improved WebUI lifecycle and maintainability by fixing document-level event handling in ExtensionsDropOverlay and extracting telemetry logic into shared modules (metrics_util.ts).
- Debugged multi-stage Chromium integration pipeline including LUCI CI failures, TypeScript strict checks, and C++ unit tests during iterative review and submission cycles.

EXPERIENCE

Software Engineering Fellow

Remote

DevWeekends Fellowship

Jun 2025 – Sep 2025

- Completed a competitive 3-month fellowship focused on advanced MERN stack development and data structures & algorithms.
- Built full-stack applications following industry-standard architecture and agile development practices.
- Solved 100+ LeetCode problems to strengthen algorithmic problem-solving and data structure knowledge.

Freelance Web Developer

Remote

Fiverr

Jul 2023 – Sep 2024

- Delivered custom web applications and frontend solutions for clients across multiple domains using the MERN stack.
- Built reusable and maintainable frontend components to improve project scalability and development speed.
- Maintained strong client satisfaction through communication, iterative feedback, and reliable project execution.

EDUCATION

University of Lahore

Bachelor of Science in Computer Science

Lahore, Pakistan

Sep 2024 – Jun 2028
